

What are burial chambers?

Burial chambers are concrete vaults which are used for burial. The chambers are pre-installed in the ground and each chamber can accept two interments.

Once an interment has taken place, the compartment is sealed with concrete slabs.

Burial chambers provide an alternative solution to traditional brick built graves incorporating a choice of memorial options supplied exclusively by **welters**.

Memorial Provision

Burial chambers include the Basilica Traditionalé decorative memorial housing unit.

The unit houses granite plaques for inscription purposes.

Inscriptions can be arranged prior to interment and fixed into position on the day of the funeral.

Basilica Traditionalé decorative memorial housing unit.

Chambers provide clean and safe burial facilities in all weathers.

Each level is hermetically sealed using water resistant resins.

The final cover slabs are protected with plastic sheeting.

Inscriptions can be prepared for the day of the funeral.

Please feel free to visit the cemetery where our staff will be glad to assist with any enquiries.
