

The perfect balance of architectural landscaping through design

The Cemetery Village™ combines the perfect mix of architectural landscaping design in decorative stone and granite with parkland aesthetics on free draining naturally reoccurring aggregates.

The village pictured takes advantage of existing ground features and is set on multiple levels to create new and natural vistas with walkways, ponds, lakes, wooded areas and wildlife sanctuaries.

Critically, the service can be offered at a relevant and viable fixed price point.

digging for interments and many more while embracing all of the cultural and emotional expectations of the bereaved.

The scheme has been consistently selling multiple double burial chamber grave spaces per week being extremely popular, as are the front charging mausoleum, classic burial chambers and niche wall interments.

The sites are starting to get established and have a very natural “country park”

feel to them with flora, and fauna getting established and thriving within the designed and landscaped wild life areas.

The development maintains many management advantages including: all weather interment, safe environment for staff and visitors, low maintenance facilities, no ground pollution, no

The perfect balance of architectural landscaping through design

The grounds teams are handling the interments with confidence and professionalism providing the public with a seamless and diverse service.

Complete Service Provision

The funeral directors locally have also taken the scheme very much as a successful service option advantage for their portfolio.

Keith Welters CEO said: "We have learned that because we have worked hard to manufacture all of our products and develop all of the skills required 'in house'"

"We find more and more customers are benefiting from our 'complete package service ability'. From architectural and planning through to bespoke scheme

design, product manufacture supply and complete installation, with PR and marketing support services also being very popular."

valuable income for the cemetery service and an important contributory in successfully funding subsequent phases of development on previously unusable areas unsuitable for traditional earthen burials ■

The revenue being generated is
