Alperton Cemetery Proposal

Note: Designs and descriptions are for discussion purposes – this is not a contractual document.

DESIGN AND DEVELOPMENT

welters propose to develop within the existing site pictured below.

The development will consist of rows of Classic Basilica 2 housing systems for cremated remains interment along the edges of the existing pathways pictured above. The paths will lead to a central area with sheltered seating and a central feature of an angel on a granite pad with circular kerb to receive posy holders. The pathways will also have simple trellis work over head.

Example views of Basilica 2 installations

Central Memorial Feature

It is proposed to develop the central area with an angel feature consisting of a single angel on a granite pad with circular kerb to receive posy holders.

Modular Seating

welters modular seating designed to be suitable for outdoor or indoor use. The seating is modular and can be configured to provide attractive seating arrangements in straight lines or curves.
